

INSTRUCTIONS FOR DC2 INTEGRA THROTTLE EXTENSION

Thread Locker Is Required For This Install

Install by firmly pressing the backing plate around and behind the pedal at an angle. Attach the extension by press fitting into the backing plate, the pedal should fit snug. Apply thread locker to the bolts and install them, starting with the top bolt to ensure proper fitment.

Once completing an install, test the pedal, ensuring it is securely fit, extends and retracts fully. Periodically inspect the hardware used to ensure it remains secure.

For further instructions or test fit enquiries, please use the contact form on our site.
